

Network Agreement (UBMTA, DUA, Credentialing, Audit) among TCRN institutions including Institution A and Institution B

Institution B

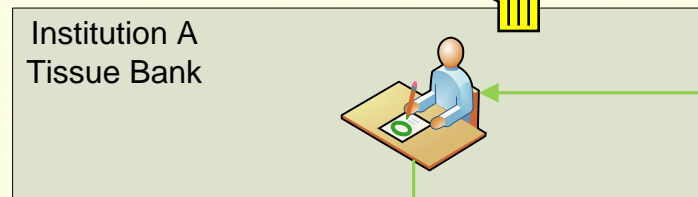

APPLIES TO DATA ONLY

Institution A

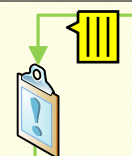

4 Local TCRN Oversight Committee at Institution B reviews documents from Investigator at Institution A, including AUA. Registers Institution B as Data Provider to protocol 001

2 Local Tissue Bank Manager checks eligibility of investigator, approves account. IT staff credentials user, creates TIES protocol 001 and adds user to protocol

3 Request to access data automatically registered to TCRN and appears at institution B

1 Investigator at Institution A has an IRB approved protocol and seeks data only from TCRN; Completes and uploads TCRN Authorized User Agreement (AUA)

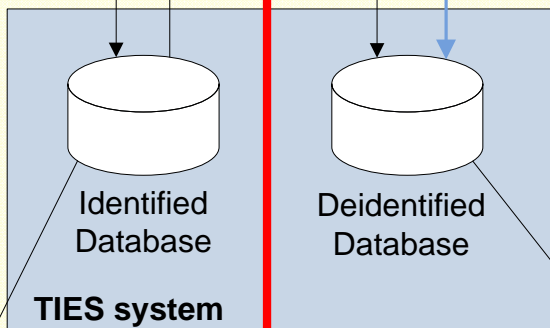

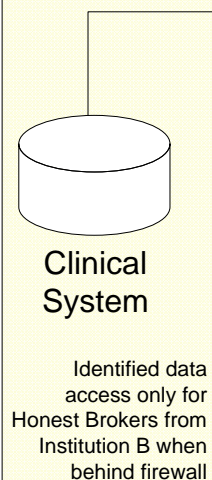

5 Investigator at institution A can now view deidentified data at Institution B (as well as own institution). Cannot download data or cut and paste text.

deidentification service creates deidentified research repository

Identified Database protected by fire wall,

Weekly or monthly data update from clinical system

Deidentified database can be accessed (view only) by researchers on protocols that Institution B has registered to.
